# WHY MAMMOTH HOLDS ITS CASH

Big Tintic Company Is Acquiring New Territory and Plan-

EXUHANGE.

The case of R. M. Johnson vs. the Jennie Gold Mining company has been on a transfer from Parowan. It is an advantage of the parently several reasons, none of which ought to cause the stock to drop as it has been doing during the past few days. When the superintendent declared a day when the superintendent declared a day when the superintendent declared a day or two ago that the mine was looking as well or better than it had ever done and declined to advance any reason for the morning trading. The market was swell or better than it had ever done and declined to advance any reason for the morning trading. The market was strong throughout and while trading was hardly as spirited as on the day previous, it was taken to mean nothing more throughout and while trading was hardly as spirited as on the day previous the process and company, which owns a group of laims adjoining the Mammoth posses.

If, accounting the Mammoth posses, if, accountin

decline in the shares of the company, information was sought elsewhere.

For one thing, it can be stated that the company has, within the last few weeks, purchased a heavy control of the Cleveland company, which owns a group of claims adjoining the Mammoth possessions on the east. This purchase, in itself, according to the best obtainable information cost the company, the company, the self, according to the best obtainable information cost the company, in the company of the company, in the company of the company of the company. The company of the company. In the company of the company formation, cost the company the equiva-lent of one month's dividend. Previous to this deal the ground in the same vi-cinity was purchased, ground which em-braced the Dom Pedro and other claims, braced the Dom Pedro and other claims, so that the outlay on ground account has been quite an item lately. Then, the company fight with the Grand Central company will be on again in January, and the company will need money for the expense that the battle in court will incur. In addition to these things, it is a matter of record that a shortage of coal has prevented the company operating full has prevented the company operating full handed for a few weeks past, so that the company decided to strengthen its treas-ury reserve before ordering another divi-

dend.

It comes from a reliable source, also, that when the Mammoth company has rounded out its possessions to the extent it has determined upon, a new triple-compartment operating shaft will be sunk from the surface to a depth of 3.000 feet, at least. When started, this work will be hurried through, and competent engineers familiar with the mine declare that the task can be completed in six to ten months, according to the number of levels the management decides to operate from. While money will be required to get this work under way, it is declared that the cost will be met several times over by the extraction of the ore that now surrounds the old shaft and which cannot be moved until a new shaft is cannot be moved until a new shaft is

When all of these things are taken into consideration, it is made reasonably plain why the stock has been slumpy for a few days, and it is also apparent that the value of the mine must be well out of the ordinary for the management to buy more ground and plan the improvement in employeest and do the work outlined equipment and do the work outlined.

# WALKER RIVER PROPERTY.

## Returned Salt Laker Describes Ground Secured by His Crowd. W. J. Craig, of the Craig-Rood-Colbath- YE

W. J. Craig, of the Craig-Rood-Colbath-McDonald syndicate, which owns a valuable group of claims in the Walker River reservation country, close to Schurz, Nev., returned from his trip of inspection to the properties yesterday morning.

"I found on arrival there," said Mr. Craig, "that McDonald had been lucky in securing a most promising piece of ground. Running through it for a long distance in an easterly and westerly direction is a great quartz dyke in the granite. This dyke is intercepted and cut by a series of fissures running northeast and southwest; by another series running northwest and southeast, and by still others with a north and south trend. The fissures, with the exception of those running north and south, are apparently filled with mothing but decomposed granite, the copper, if they ever contained any, having leached out. The north and south fissures, particularly near the quartz dyke, show good ore, and the dyke itself, in places where the values have not leached down, shows masses of fine ore of greater or less extent. Rich float from the ledge can be picked up anywhere.

"By running a tunnel from the bottom."

float from the ledge can be picked up anywhere.

"By running a tunnel from the bottom of the canyon 400 feet a depth of 375 feet under the dyke, where the best showing of ore appears, can be obtained. One of the northwest-southeast fissures can be followed to a connection with one of those running north and south, and the latter can be followed into the dyke. In the soft, decomposed filling of these fissures the work can be prosecuted rapdly and at comparatively small expense. The ground gives every indication of making a mine and the tunnel scheme will likely be adopted as the best plan of development. It is only a mile from the railroad and one and one-half miles from Schurz. I like the looks of it."

# M'DONALD-ELY'S BOOM.

Allotment Price Nearly Doubles During a Single Day.

wednesday morning the fact was mentioned that 150,000 shares of stock in the McDonald-Ely company had been offered for subscription, and a few hours ater, before the brokerage firm offering thad realized what had happened, the amount was over-subscribed by 45,000 shares. But that is not the limit of oppularity attained by the new flotation. When it was learned yesterday morning that the subscription had closed and that the applications for shares would have to be trimmed to beat the band, bidding for alloiments began on the floor of the exchange and on the street. The subscription price of the issue was fixed at \$1.50 a share, and when 4 o'clock arrived offerings of \$2.50 per share were freely made and, so far as known, without a single deal being made.

The organization of the company has not yet been perfected, but one of the big men in it stated during the afternoon that the articles of incorporation might be filed by tomorrow and certainly not letter than pearly in the coming week

noon that the articles of incorporation might be filed by tomorrow and certainly not later than early in the coming week. In the meantime, it is presumed the subscription list will be trimmed to meet the exigencies of the case and that applicants for stock will be advised of their allotments and when payment can be made and the stock secured.

## STRIKE IN LITTLE BELL.

LIKES THE JENNIE.

at the Start Inspects Mine.

New Ore Body Reported in Absolute- Easterner Who Backed Proposition ly Virgin Ground.

While it was impossible to catch Manager Newton Dunyon and get particulars, it came from a perfectly reliable source yesterday that a new and most important strike had been made in the Little Bell company? Park City property. The strike was made above the 700 level, but how far above could not be ascertained. It is at or near the juncture of the main ore-bearing fissure and the contact, and the statement is made that a large body of exceedingly fine ore is being opened up.

"All that I am certain of," said The Herald's informant, "is that the strike has been made in absolutely new and virgin ground. No, the strike was not how far solve the 700, but if you can be about it; he can if he will."

All the statement is made that a large body of exceedingly fine ore is being opened up.

"All that I am certain of," said The Herald's informant, "is that the strike may be above the 700, but if you can catch Mr. Dunyon get him to tell you about it; he can if he will."

All the strike was not seen the following the strike was not in the strike was not seen the statement is made that a large body of exceedingly fine ore is being opened up.

"All that I am certain of," said The Herald's informant, "is that the strike may be above the 700, but if you can catch Mr. Dunyon get him to tell you about it; he can if he will."

The case of R. M. Johnson vs. the Jenus Herald Strike Camp in the strike was the man that stood behind the property did not show up like it does today. We have kept him advised of what was doing and how the ground was developing, and I am glad that he leaves today. We have kept him advised of what was doing and how the ground was developing, and I am glad that he leaves and but one of the projents from which the formal heaves the project was not strike the surprised in the stuffs in the Jennie Gold Mining & Mr. Wilson would not discuss the milling company, has pleased if the camp discuss the stuffs in the vision would not discuss the strike as the will plane strike that he surprised if the camp discuss the su

ning for the Future.

"All that I am certain of," said The Herald's informant, "is that the strike has been made in absolutely new and virgin ground. No, the strike was not made in the winze below the 700, though the showing there is a fine one. The new discovery is above the 700 and it may be above the 300, but if you can catch Mr. Dunyon get him to tell you about it; he can if he will."

Men Are Going in Daily by Way of Mill City and Humboldt.

Mill City and Humboldt.

Duplicating their success at Fairview and other Nevada camps, the active, energetic Salt Lake boosters have landed with both feet at Rosebud, Humboldt's new bonanza district, and have gotten in on nearly all the good things, says the Humboldt Star of Tuesday.

George Wilson, who carried the glad tidings of Rosebud to Salt Lake and passed the plums around among his friends, teturned frem a trip to that city yesterday in company with P. M. McGregor, A. R. Scott and R. M. Lawrence. They went out to Rosebud last evening, taking along ten miners who will be put to work on the various properties which they and their Goldfield associates have acquired, ircluding the Golden Anchor and Dreamland groups. It is also reported that the same crowd have active to the company with the position of the company with the properties which they and their Goldfield associates have acquired, ircluding the Golden Anchor and Dreamland groups. It is also reported that the same crowd have active to the company with the properties which they are defined associates have acquired that the same crowd have active to the company with the properties which they are defined associates have acquired that the same crowd have active to the company with the properties which they are defined associates have acquired that the same crowd have active to the company with the properties which they are defined associates have acquired that the same crowd have active the company with the properties which they are defined associates have acquired that the same crowd have active the company with the properties which they are defined associates have acquired the glad tidings of Rosebud to Salt Lake and tidings of Rosebud to Salt Lake and the properties which the properties which they are the properties which they are defined associates have acquired the glad tidings of Rosebud to Salt Lake and the properties which the properties which they are the properties which the properties which the properties which the properties which the propert

quired from Phil Blume the Brown Palace group, where the recent bonanza strike was made, and at a price which is little short of staggering.

"You will see things hum at Rosebud from now on," said Mr. Wilson. "Don't be surprised if the came celupses Goldfield, for the stuff is there to do it."

Mr. Wilson would not discuss the plans of himself and associates or the extent of their holdings, but gave out enough to make it plain that there are going to be big things don, and that they are in on the ground floor in the nest things in the came, including the townsite.

rush is on in the farnest from Mill City and Humboldt, which are the nearcst railroad points. Twenty men left Salt Lake last night for the new calar and this is but one of the points from which the fortune hunters are hurrying to Humboldt's newest bonanza camp.

Frantic Effort to Follow Fluctu ations in St. Paul During the Day.

## PUBLIC NOT IN EVIDENC

New York, Nov. 15 .- The day's market was dominated by varying fluctuations St. Paul and these were so constant as keep sentiment upon the general market a good deal unsettled. Sales to realize upon the wide advance of the last few days caused an appearance of weakness in St. Paul, to which the whole market responded and again, when St. Paul was supported and showed signs of heavy accumulation on a rapidly rising scale the whole market once more turned strong. This was largely due to the belief among professional operators that they could read the course of the Standard Oil group. read the course of the Standard Oil group of capitalists in the operations in St. Paul and to the eagerness to follow the leader-

## Determined to Lead.

The Utah Savings & Trust Com-The Utah Savings & Trust Company is acting as trustee on a considerable number of bond issues of local industrial and mining companies. Its charges are reasonable and its services efficient. It has a savings bank whose deposits are rapidly building up. It makes abstracts that give perfect satisfaction, because they are accurate. It issues bonds for contractors and all legal requirements. It is building a seven-story building at No. 235 Main street. It is determined to lead in its several lines.

UTAH SAVINGS & TRUST CO. No. 160 Main Street. The bank that pays four per cent.

heavy, 6.10@6.20; packers, 6.10@6.20; pigs and lights, 5.50@6.15. Sheep—Receipts, 14,000; market steady, weak. Muttons, 4.50@5.50; lambs, 5.50@7.25; range wethers, 4.25@6.00; fed ewes, 4.005.25
